News Briefs

A training program for a new type of mental health clinician has received a two-year renewal grant of $150,000 from the Henry J. Kaiser Family Foundation. The grant was jointly awarded to UC-San Francisco, School of Medicine, UC-Berkeley and Mount Zion Hospital.

A new program to improve treatment of back problems is starting at UCSF. Funded by the Folger Foundation of San Francisco, it is directed by Gerald Gill, Associate Clinical Professor of Orthopedic Surgery. According to Donald B. Lucas, Chairman and Professor of Orthopedic Surgery, this program will let Dr. Gill and his colleagues develop a profile of each patient, both before and after treatment.
The data in the profiles includes such information as childhood injuries, sport injuries, concurrent injuries, and results of psychological testing. Complete evaluation of laboratory tests and x-rays are also part of the patient-profile. It is anticipated that the comprehensive profiles will contribute to the improvement in selection of the best treatment for each patient with a back problem.

UCSF Hospitals were among ten San Francisco Bay Area hospitals which recently received approval under the newly consolidated hospital survey program of the California Medical Association and the Joint Accreditation of Hospitals. CMA approval is based on medical staff organization, treatment of patients and the documentation and evaluation of medical care. JCAH studies the administration and structure of the hospital, as well as equipment, nursing and related aspects.

UCSF has achieved full accreditation from Western Association of Schools and Colleges. The next full visit of the association will be held in 1985-86 with a one-day fifth year review held in 1980.

The UCSF United Way Campaign raised $71,859 in donations from nearly 2,000 donors . . . a 27% increase in dollars from last year and a 10.5% increase in donors.

The large Roman numeral clock which topped the old medical school building on Parnassus Heights for nearly three quarters of a century will be restored by the UC Faculty Wives. The clock was dismantled and placed in storage a decade ago when the building was demolished. Faculty Wives would like it to occupy a future prominent place on Moffitt Hospital. To date they have raised $2,600 of their $10,000 goal.

The Ocular Oncology Clinic is a new service established at UC-San Francisco in the Clinical Research Center for Eye Disease, Department of Ophthalmology. It is partially supported by grants from a private foundation, That Man May See, Inc. Designed to study cancers of the eye and adjacent tissue, the Ocular Oncology Clinic provides examinations, laboratory tests, and diagnosis and makes recommendations for treatment. Patients will be referred to the Clinic by their physicians.

Wheelchair ramps have been added on the west side of Moffitt Hospital, front circle, and on the Parnassus sidewalk in front of the circle.

The 50-bed field hospital for earthquake victims in the devastated rural community of Comalapa, Guatemala is staffed with Bay Area volunteers, many of whom are physicians, nurses, and laboratory technicians on the staffs of UCSF affiliated hospitals. For information contact the Committee for the Relief of Guatemala, 2600 Ingalls St., San Francisco 94124; phone 822-9270.
The field hospital was set up February 20, by Dr. Jim Adams, a former UC medical resident at SFGH who is now assigned to the VA Hospital, and Dr. Curtis, a medical resident on the UCSF campus. The hospital is sponsored by the San Francisco Committee for the Relief of Guatemala.
Seven of the 11 volunteers who left for Comalapa by Pan American Airways, March 17, were associated with UCSF. They are Ed Gucksman, a UCSF resident assigned to a clerkship at SFGH; Martha Tracy, UCSF resident in medicine; Barry Glick, R.N., of UCSF; Ann Biderman, graduate student, UCSF School of Nursing; Ronald Young, UCSF lab technician; Kati Nagel, R.N., of UCSF; and David Kaufman, UCSF Medical Student. Members of the team who went to Guatemala March 1 were Dr. Phil Elkin, UC resident in Family Practice at SFGH; Sandy Phoenix, R.N., of SFGH; and Joanne Rush, lab technician at SFGH.

Recent winners of the Graduate Students Association Research Contest were: first prize, J. Pablo Huidobro-Toro, Pharmacology; second prize, Dennis A. Steindler, Anatomy; third prize, Donald Thorne, Pharmacology; fourth prize, Steven A. Colwell, Anatomy; and fifth prize, John W. Holaday, Pharmacology.

News Briefs

Thanks to the staff of the SFGH Pediatrics Clinic and the United Mainliner Club (United Airlines employees' association) fourteen-year-old twin brothers, suffering from severe, chronic asthma have arrived at the National Jewish Asthma Hospital and Research Center at Denver.

The twins are patients of Mary Alice Murphy, UCSF Clinical Instructor of Pediatrics, and have been treated at SFGH for years. When it was determined that they needed residential treatment, plans were made to send them to the Denver hospital, where their medical expenses are covered by Medi-Cal. The United Mainliner Club paid for the air fare.

The Family Practice Residency Program is hosting the annual meeting of the North American Primary Care Research Group, April 22-27 at the Holiday Inn, San Francisco financial district. William Gerber, Asst. Director, SFGH Family Practice Residency Program, and Peter Sommers of the FPRP faculty will present papers.

UCRS-Social Security Coordination ballots have now been distributed to all eligible employees who must vote by April 23 on whether to coordinate their UC Retirement System with Social Security or to remain in UCRS without Social Security. If you have not received your ballot, contact your department AA. If you have further questions on what is best for you, call Personnel, Ext. 3003.
